

EZ Vent-N-Closure

New
Construction

Retrofit

Custom Metal Components, Inc.
Presents

A Unique Continuous Ventilation/Closure System

US Patent #8,151,524.

www.ezventnclosure.com

- **Continuous Metal Roof Ridge Ventilation**
- **Passed the 110 mph Wind Driven Rain Test**
- **26 Gauge Construction with Built-In Closure**
- **5ft. Lengths for Ease of Installation**
- **Eliminates Foam Closure Failure**
- **Designed for Most Metal Roofing Profiles**
- **Ideal for Retro-Fit Applications**
- **Metal Buildings, Post Frame, Residential**
- **Made in The U.S.A.**

More Information

Why Ventilate Your Metal Roof?

One of the most critical factors in a metal roof system is proper ventilation. Ventilating a metal roof is important because it carries out excess moisture which tends to be generated in all buildings. If this moisture is not vented outward it will condense on cooler surfaces, such as the underside of the roof deck or metal panels. Condensation can create an unhealthy and potentially very damaging condition.

During the winter, proper venting will prevent roof "hot spots" which leads to melting snow and eventual ice formation or ice damming.

During the summer, ventilation eliminates excessive radiant heat that gathers in attics and at the roof line of buildings, which can lead to higher energy usage.

Advantages for Contractors

As a contractor, one of the most important commodities you have is your reputation. You have worked hard in building up your reputation by taking care of your customers and providing the best that you can offer. Pride of doing quality work, doing it fast, and leaving customers satisfied is how you built your business.

Call backs can damage your reputation and erode your profits. Here's how EZ Vent-N-Closure can help you protect both, while providing you (and your customers) peace of mind:

- Easy installation for continuous metal roof ridge ventilation
- Eliminates the multi-step process of other ventilation systems
- Closure not exposed to UV rays (which is the main cause of foam failure & callbacks)
- Superior construction (26 gauge steel)
- Passed the 110mph wind-driven rain test (tested at a 1/4":12 roof slope)
- Great for use at hip conditions

You are a true craftsman, taking pride in your workmanship and the materials you provide. Your customers demand the best. By making EZ Vent-N-Closure an integral part of the metal roofing systems you provide, you will gain a competitive edge and demonstrate your innovative approach in providing true solutions your customers are seeking.

Benefits to Home/Building Owners

Your decision to invest in a metal roof is a wise one. The benefits offered by today's metal roofing systems is far and above those of other roofing systems. Selecting EZ Vent-N-Closure, as your ridge ventilation of choice, offers you the following lasting benefits:

- Keeps a clean, attractive roofline (hides underneath your ridge cap)
- Utilizes the natural flow of air and rising heat (no power, moving parts or noise)
- Maintenance free (no clogging)
- Decrease your energy consumption (removes stagnant hot air)
- Provides weather-tight ventilation (when installed per manufacturer's instructions)

Insist your contractor installs the most effective ridge ventilation/closure system as part of your metal roof...
